SUMMARY

Client-facing Solutions Architect with experience implementing enterprise API products for Fortune 500 healthcare organizations. Specializes in customer discovery, translating business requirements into technical solutions, and coordinating delivery across engineering, product, and commercial teams. Computer Science and Business Administration background with a strong interest in capital markets and financial technology.

SKILLS

Client Engagement: Enterprise stakeholder management, technical discovery, solution demonstrations, requirements gathering, customer relationship management.

Solution Delivery: Systems integration, solution architecture, enterprise implementations, workflow optimization, cross-functional coordination.

Commercial: Account expansion, sales collaboration, customer adoption, business value alignment.

Technologies: REST APIs, AWS, Microsoft Azure, generative AI, LLM workflows.

EXPERIENCE

Solutions Architect

Aug 2024 â€“ Present

Cognizant, Healthcare Products (TriZetto)

â€¢ Manage post-sales implementation across 10+ enterprise deployments at leading U.S. health insurers and provider organizations, from solution design through production go-live in regulated environments processing millions of transactions.

â€¢ Serve as the direct technical point of contact for 15+ client accounts and ~30 client teams, leading discovery sessions, solution demonstrations, and stakeholder discussions that turn ambiguous requirements into clear solution designs.

â€¢ Coordinate a dozen API integrations and dozens of workflows between healthcare platforms and client systems, aligning client, product, and engineering teams on requirements, data mapping, and go-live.

â€¢ Develop AI-powered automations to streamline enterprise healthcare implementations, using open-source agents and LLMs within approved development and production environments.

â€¢ Partner with sales and account teams to identify customer needs, uncover expansion opportunities, and communicate business value to client stakeholders.

Software / ML Engineering Intern

Jun 2023 â€“ Aug 2023

Cognizant

â€¢ Built software and machine learning components for internal tools and automation; presented technical options to mixed business and engineering audiences.

IT Consultant, Automation & Infrastructure

May 2022 â€“ Oct 2022

Rutgers University, Office of Information Technology

â€¢ Built a self-service platform for students to reserve lab computers and seats in advance, replacing first-come lines and wasted trips to full labs and libraries and making peak-hour capacity far more efficient.

Additional programs: JPMorgan Chase Technology Program, Morgan Stanley Audit Technology, Palantir Launch.
